

SAUTER: a highly competent partner for energy-efficient building management systems.

We monitor and measure, we analyse and evaluate, we react and optimise, and we accompany buildings into the future.

SAUTER ECO¹⁰: our ten-point programme of extensive services which demonstrate how we use our solution expertise to:

- provide an advanced and sustainable system of energy management
- improve energy efficiency
- reduce CO₂ emissions
- protect the environment

1. CENTRALISATION and VISUALISATION of all energy-related data
2. Critical analysis of CONSUMPTION: benchmarks from internal and external sources
3. Tailor-made ENERGY CONCEPT for the whole life-cycle of the building
4. Evaluation of RENEWABLE ENERGIES
5. Drastic REDUCTION in CO₂-EMISSIONS
6. Certified PRODUCTS and SOLUTIONS that are geared towards the future
7. Open and universal BUILDING AUTOMATION SYSTEMS
8. The BUILDING'S ENVELOPE, building automation system and technical systems all in accord with each other
9. A CHANGE IN USERS' ATTITUDES towards energy-saving
10. Definite REDUCTION in OPERATING COSTS

Life-cycle of the building
